FOREWORD

The Indian Standard (Part 9) (Fifth Revision) was adopted by the Bureau of Indian Standards, after the draft finalized by the Sanitary Appliances and Water Fittings Sectional Committee had been approved by the Civil Engineering Division Council.

This standard was first published in 1963. The first, second, third and fourth revisions were issued in 1967, 1972, 1979 and 1995 respectively. In this revision, load bearing test on bidets has been included and other changes, keeping in view the current manufacturing practices in the country, have been made.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or analysis, shall be rounded off in accordance with IS 2:1960 'Rules for rounding off numerical values (revised)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.
Indian Standard

VITREOUS SANITARY APPLIANCES
(VITREOUS CHINA) — SPECIFICATION

PART 9 SPECIFIC REQUIREMENTS OF PEDESTAL TYPE BIDETS

(Fifth Revision)

1 SCOPE

This standard (Part 9) lays down the requirements for patterns, construction, dimensions and tolerance, finish, inspection and marking of pedestal type bidets made of vitreous china.

2 REFERENCES

The following standards contain provisions which through reference in this text constitute provisions of this standard. At the time of publication the editions indicated were valid. All standards are subject to revision and parties to agreements based on this standard are encouraged to investigate the possibility of applying the most recent editions of the standards indicated below:

3 GENERAL REQUIREMENTS

The general requirements relating to terminology, materials, manufacture, glazing, defects, minimum thickness, performance and methods of tests covered in IS 2556 (Part 1) shall be complied with.

4 PATTERNS

4.1 Pedestal bidets shall be one of the following patterns and sizes:

a) Pattern 1 — Pedestal bidets with flushing rim and spray hole (see Fig. 1A and 1B)

b) Pattern 2 — Pedestal bidets without flushing rim and over rim supply (see Fig. 2A and 2B)

4.1.1 Pedestal bidets may also be made in other patterns where so agreed to between the manufacturer and the purchaser. However except for functional dimension, all other requirements as laid down in this standard shall be complied with.

5 CONSTRUCTION

Pedestal bidets shall be of one-piece construction. Pedestal bidet with flushing rim shall have three tap holes and a spray hole as shown in Fig. 1A and 1B. The pop up hole shall be optional. The central hole shall have the provision to supply water to the rim. Pedestal bidet without flushing rim shall be provided with one or three tap holes and without any spray holes as shown in Fig. 2A and 2B. Each bidet shall be provided with a tap fitting hole of dimension as shown in Fig. 3 with or without overflow arrangement. Suitable provision shall be made for fixing the bidet to the floor.

6 DIMENSIONS AND TOLERANCES

6.1 The functional dimension (dimensions other than connecting dimensions) and connecting dimensions (critical for plumbing requirements), shall be as given in Tables 1 and 2 respectively.

FIG. 3 DETAILS OF TAP FITTING HOLE

FIG. 4 DIMENSIONS OF WASTE OUTLET HOLE
6.3 Tolerance where not given for specific dimensions shall conform to IS 2556 (Part 1).

7 FINISH
The inside surface of the bidet and waste outlet shall be glazed uniform, smooth for efficient drawing.

8 LOAD BEARING TEST
Bidet shall be fixed in a stable arrangement on the floor with proper screw. A load of \(400 \pm 5\) Kg or a force of \(4 \pm 0.05\) kN shall be applied for period of 1 h by placing it on a wooden beam with a cross-section of 100 mm \(\times\) 100 mm positioned across the centre of the opening of the top surface of the bidet. There shall be no damage or defect shall occur to the bidet.

9 SAMPLING PROCESS, INSPECTION AND LOT INSPECTION
The recommended method of sampling process, inspection and lot inspection shall be as given in IS 9140.

10 MARKING
10.1 The bidet shall be clearly and indelibly marked at a suitable place with the following:
   a) Name or trade-mark of the manufacturer, and
   b) Batch/Lot number.

10.2 BIS Certification Marking
10.2.1 Each bidet may also be marked with the Standard Mark.
10.2.2 The use of the Standard Mark is governed by the provisions of the Bureau of Indian Standards Act, 1986 and the Rules and Regulations made thereunder. Details of conditions under which a license for the use of the Standard Mark may be granted to manufacturers or producers may be obtained from the Bureau of Indian Standards.
Bureau of Indian Standards

BIS is a statutory institution established under the Bureau of Indian Standards Act, 1986 to promote harmonious development of the activities of standardization, marking and quality certification of goods and attending to connected matters in the country.

Copyright

BIS has the copyright of all its publications. No part of these publications may be reproduced in any form without the prior permission in writing of BIS. This does not preclude the free use, in the course of implementing the standard, of necessary details, such as symbols and sizes, type or grade designations. Enquiries relating to copyright be addressed to the Director (Publications), BIS.

Review of Indian Standards

Amendments are issued to standards as the need arises on the basis of comments. Standards are also reviewed periodically; a standard along with amendments is reaffirmed when such review indicates that no changes are needed; if the review indicates that changes are needed, it is taken up for revision. Users of Indian Standards should ascertain that they are in possession of the latest amendments or edition by referring to the latest issue of ‘BIS Catalogue’ and ‘Standards: Monthly Additions’.

This Indian Standard has been developed from Doc : No. CED 3 (7003).
